

LEARNING LAB IMPLEMENTATION PLAN

10 Steps to Adopting a Lab

The key to the success of implementing a Lumination Learning Lab in your school is having a clear roadmap. We are invested in making sure that your teachers are empowered to use the lab successfully, that your ICT team is equipped to support the program, and most importantly, that your students are excited about the endless possibilities for learning.

1

Team Onboarding

Even before your Lab is built, we will run two (2) full-day sessions with your technology leaders and curriculum leaders where we will run through technology tips, tricks, troubleshooting, curriculum links, software and everything else you need to know about your Lumination Learning Lab. We can also facilitate transition sessions for students in our Lab.

4

Lab Launch Incursions

As part of your Lab's launch, our Learning Design Team will run introductory sessions for your students as a full day incursion.

3

Teacher Planning Sessions

To build teacher confidence and excitement for your Lab, we can facilitate planning sessions for your staff. In these sessions, we will explore different ways the Lab can be used across all areas of the curriculum.

2

Getting Started with your Lab

When your Lumination Learning Lab is completed, we will deliver comprehensive getting started and pedagogy guides that are tailored to your site.

5

Teacher Support Sessions

Our Team will return to your school for two (2) full days per term to assist your teachers with running lessons in the Lab with the students.

6

School Community Project

We will consult with your teachers to develop a community or site-based project that is relevant to your school. We will visit your site for a day to launch the project. A project like this is extremely important as it gets staff and students excited to use technology to solve your chosen problem.

7

Teacher Professional Development

Once you've been using your Lab for a couple of terms, we will work with the school to tailor additional teacher professional development. We are able to provide up to 24 hours of professional learning per school. This can go toward the required hours for maintaining teacher registrations.

10

Ongoing technical and pedagogical support

To ensure the success of your Lab, we will have a number of programs that you can access on an ongoing basis. We are committed to making your Lumination Learning Lab a success.

9

12 Month Check In

We will schedule a 12 month check in visit to your school to make sure you are getting the most out of your Lumination Learning Lab. At this time we can also review the progress of your school project and provide any guidance needed.

8

Lumination Certified Educators

Teachers may be nominated by leadership or self-nominated to become your schools' 'Learning Lab Ambassadors'. These Teacher Ambassadors can take part in our Lumination Certified Educators Program. This will enable them to receive ongoing communication, professional learning, and networking opportunities that would make them great champions of innovative learning that they can bring back to your school and the wider education community
